## How to link domain to wix

**Important:** Before you can connect a domain, your Wix site must be upgraded to a Premium Plan. There are three ways how you can point your domain registered with us to your website created with Wix - you can do it with the help of nameservers, using an IP address or our Wix DNS template. **PLEASE NOTE:** By default, Wix recommends choosing nameservers setup. Pointing a domain using nameservers Pointing a domain using an IP address Pointing a domain using Wix DNS template setup Pointing a domain using nameservers

2. Sign in to your Namecheap account.
3. Select Domain List from the left sidebar and click on the Manage button next to your domain name.
4. Select the Custom DNS option from the drop-down for Nameservers and enter your Custom nameservers (you see in your Wix account) into the fields. Once done, make sure you click on the green checkmark to save the changes. It may take 24-48 hours for DNS changes to take effect. **NOTE:** If you had an email service or other DNS records set, then you would need to re-configure them on the Wix's side.
5. Return to your Wix account to verify the domain connection (step 3). Pointing a domain using an IP address
2. Sign in to your Namecheap account.
3. Select Domain List from the left sidebar and click on the Manage button next to your domain name.
5. Configure the three records you see in your Wix account if you want to use a bare domain for your website, e.g. yourdomain.tld: A record for @ pointing to 23.236.62.147 \*CNAME record for www pointing to www192.wixdns.net\* \*These values are just examples, the correct ones should be provided in your Wix account.
6. Click on the Save All Changes button once done. Normally, it takes 30 minutes for newly created records to take effect.
7. Go back to your Wix account to verify the domain connection (step 3). Pointing a domain using Wix DNS template setup

**PLEASE NOTE:** By default, Wix recommends choosing nameservers setup. But no worries, you can still use our special Wix DNS template option. Just do not forget to make sure that Connection Type: Pointing is set on the Wix side. By the way, when applying Wix template, you do not need to wait for 24+ hours for the propagation completion as the settings will come into the effect within an hour only! Additionally, choosing the Wix DNS template you will be able to use our Free Email Forwarding feature.

3. Locate the Advanced DNS tab and select the DNS Templates section.
4. From the drop-down menu, choose the Wix option.
5. Once chosen, click on the green checkmark to save these changes.
6. Confirm these actions by clicking the Continue button.
7. If these settings were properly applied, a "Success!" message will appear. If these settings were not properly applied, an "Error" message will appear.

**PLEASE NOTE:** Should this message appear, please contact our 24/7 Customer Support for further assistance.

8. Your successful domain name setup will then be shown with a Product label, which indicates the number of connected services. If you have any questions, feel free to contact our Support Team. Pointing a domain to Wix using DNS IP records

It's possible to setup DNS records to link your Wix website to your domain if it is pointed to Ecenica Free DNS. We strongly recommend using the Pointing method to connect your Ecenica domain to your Wix website if you have a Ecenica Email hosting plan. Using Ecenica name servers and connecting your domain to your Wix website using Pointing keeps your email accounts working 100% and ensures all our advanced email features such anti-spam and anti-spoofing work correctly.

Log in to your Wix account. Select Domains from your account menu. Click Connect a domain you already own Enter your Ecenica domain name. For example, example.com. Click Connection Method and select Pointing. Click Confirm. Click Next Click Start to begin the connection process. Click I logged in. Click I found my domain settings. Click I found the records. Wix will provide you with two DNS records: Open Ecenica Dashboard and go to the Domains page. Select your domain you wish to connect to Wix. Click Domain Tools > DNS Management Click A in the Filter section Click Edit next to your existing root A DNS record. In our example it is example.com. You would see your domain. Change the Record entry and enter the IP Address Wix provided in step 6. Click Save Record Click CNAME in the Filter section Click Edit next to your existing www. DNS record. In our example it is www.example.com. Change the Record entry and enter the CNAME record Wix provided in step 6. For example, www195.wixdns.net and click Save Record. Go back to your Wix account and click I updated my records to complete.
